Position: Security Architect
Location: Melbourne

Context

We are seeking a skilled Security Architect to join our team and provide expert guidance on security architecture for our insurance customers. The ideal candidate will have a strong background in cloud technologies, particularly Azure and O365; however, general knowledge of cloud technologies and security controls will be considered favourably. Candidates should also possess relevant credentials in security architecture. As a Security Architect, you will play a key role in ensuring the security of our internal programs, collaborating with cross-functional teams to implement robust security solutions and mitigate risks effectively.

If you are passionate about security architecture and have a strong background in cloud technologies, particularly Azure and O365, we would love to hear from you. Apply now to join our dynamic team.

Responsibilities and Outcomes

- Develop and maintain security architecture for internal programs, ensuring alignment with industry best practices and compliance requirements.
- Collaborate with internal stakeholders to understand program requirements and identify security needs.
- Design and implement security solutions for cloud-based environments, with a focus on Azure and O365.
- Conduct design reviews of solution architectures to ensure compliance and identify vulnerabilities.
- Conduct security assessments and risk analysis to identify potential vulnerabilities and recommend mitigation strategies.
- Provide guidance and support to product development teams and projects on security best practices and implementation of security controls.
- Stay up-to-date with the latest security trends and technologies, recommending new approaches to enhance security posture.
- Document security architecture, processes, and procedures, ensuring they are well-documented and easily accessible to relevant stakeholders.
- Collaborate with other security team members to ensure a cohesive and effective security strategy across the organisation.

Skillsets (or role type)

- SABSA, CISSP or equivalent certification in security architecture.
- Minimum of 3 years' experience in security architecture, with a focus on cloud technologies.

Sensitivity: Public

- In-depth knowledge of Azure and O365 security best practices and implementation.
- Strong understanding of security frameworks and standards, such as NIST, ISO, CIS, SACSF, ISM.
- Excellent communication and interpersonal skills, with the ability to effectively communicate security-related concepts to technical and non-technical stakeholders.
- Strong analytical and problem-solving skills, with the ability to identify and mitigate security risks effectively.
- Ability to work independently and collaboratively in a fast-paced environment.

Pre-requisites

Staff must have work rights in Australia and will be required to complete a successful police check prior to commencement.
